

OCTOBER 2026

PARTICIPATORY SCHOOLS OF ENERGY CULTURE

NEWSLETTER #4

**From energy awareness to participatory action
Two years of learning, cooperation and community
engagement across Europe.**

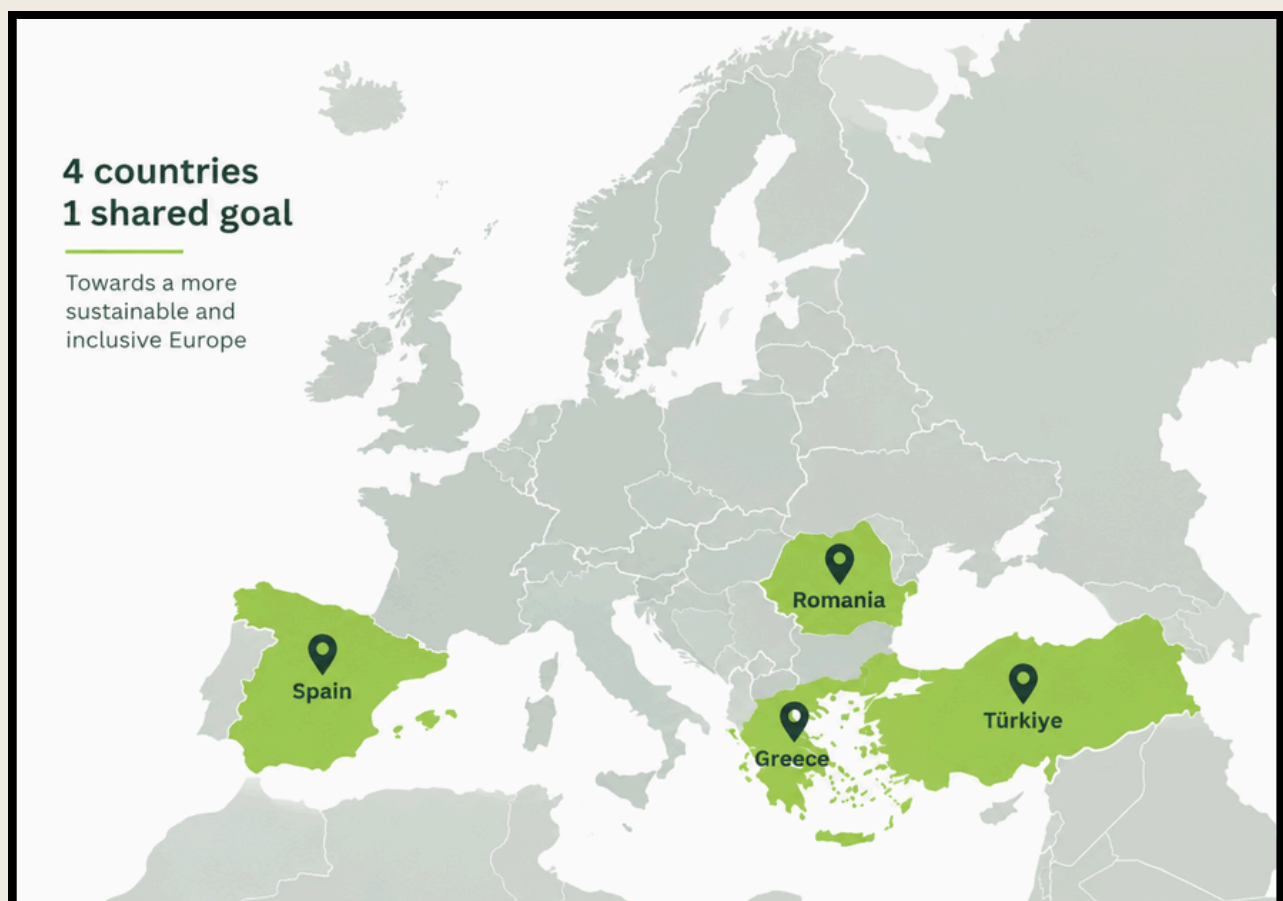

2024 — 2026 | Spain · Türkiye · Greece · Romania

TWO YEARS BUILDING A PARTICIPATORY ENERGY CULTURE

Participatory Schools of Energy Culture was launched with the aim of bringing energy culture closer to citizens and encouraging more active participation in the transition towards sustainable energy models. Over two years, organisations from Spain, Greece, Romania and Türkiye have worked together to combine information, education and citizen participation around energy and sustainability.

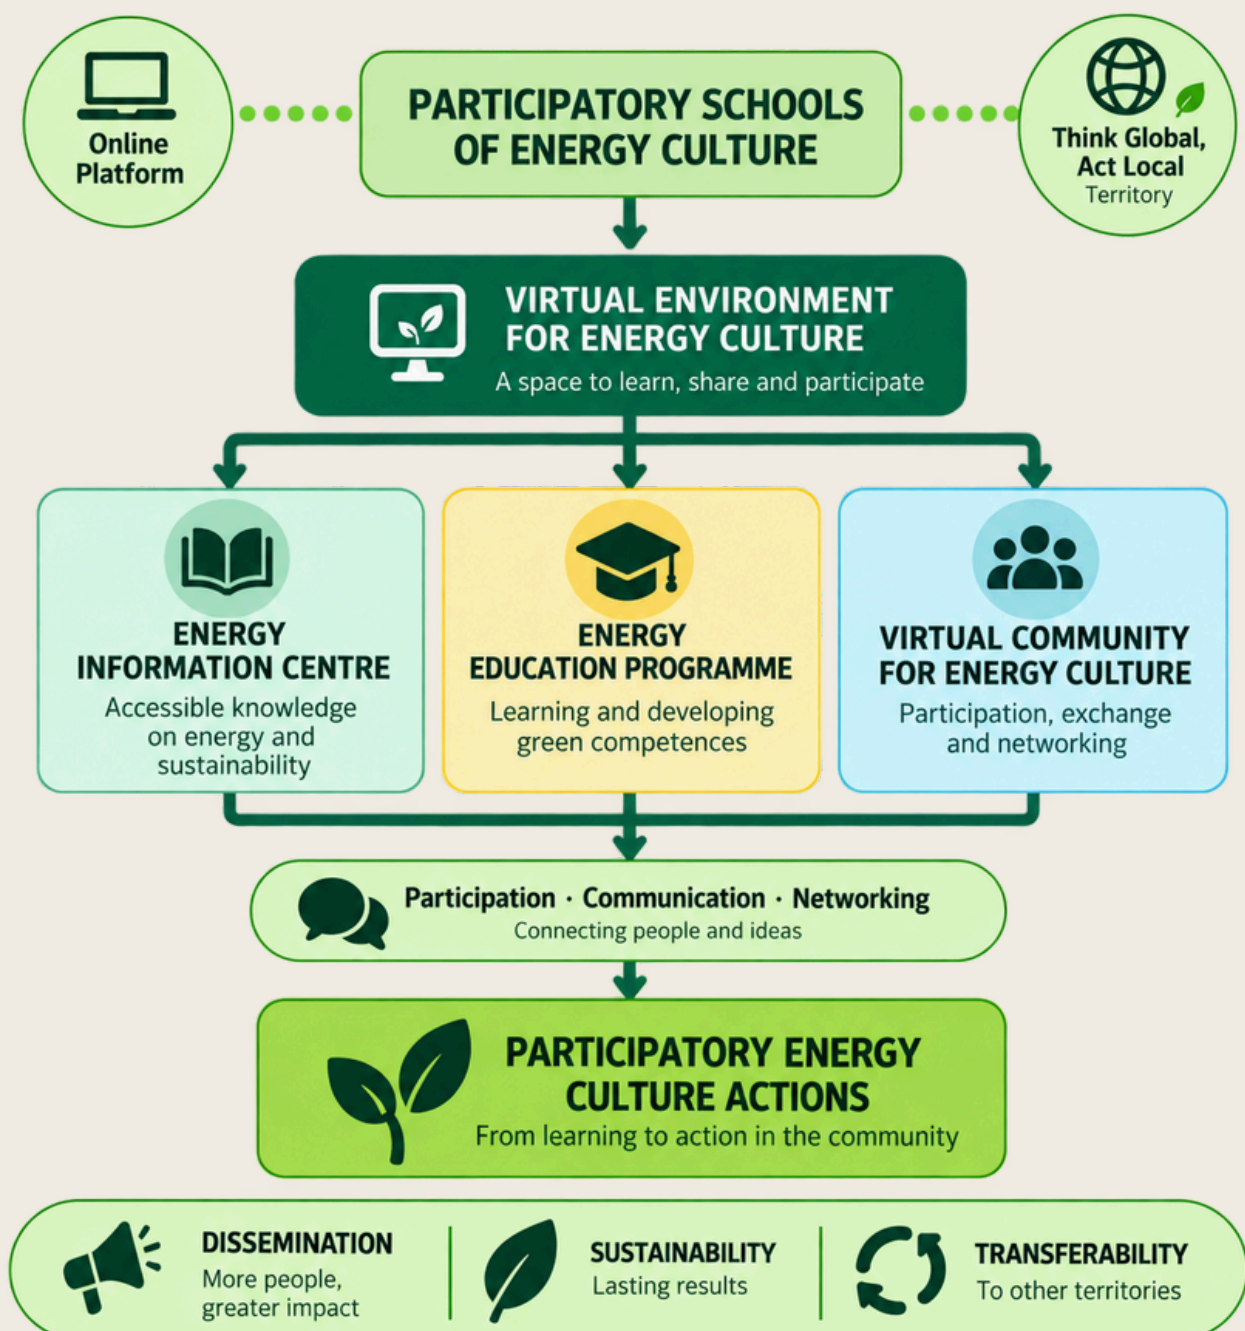

The project has developed educational and digital resources to improve energy knowledge and develop green competences, while creating opportunities for participants to turn their learning into concrete ideas and actions within their communities.

As the project approaches its conclusion, we look back on this journey, highlighting the main results achieved and the resources that will remain available beyond the project's lifetime.

FROM KNOWLEDGE TO PARTICIPATORY ACTION

The Participatory Schools of Energy Culture project has followed a pathway that connects information, education and participation. Its different resources and activities complement each other to facilitate learning about energy culture and encourage participants to turn the knowledge and competences they have acquired into active participation and concrete actions within their communities.

OUR KEY RESULTS

ENERGY INFORMATION CENTRE

Provides resources, materials and information on energy and sustainability, making useful knowledge more accessible and helping to improve energy literacy among citizens.

ENERGY EDUCATION PROGRAMME

An educational programme designed for adults to expand their knowledge of energy culture and develop green competences through two online courses.

VIRTUAL COMMUNITY FOR ENERGY CULTURE

A space for participation and exchange that connects participants and facilitates communication, networking and the development of initiatives related to energy culture.

TESTING THE ENERGY EDUCATION PROGRAMME

Between April and July 2026, the Energy Education Programme was tested in Spain, Greece, Romania and Türkiye with participants from different professional and educational backgrounds. Participants completed and evaluated both courses, assessing aspects such as the clarity and organisation of the content, the resources provided, ease of navigation, the practical usefulness of the learning experience and overall satisfaction.

The combined evaluation results were very positive across all four countries, particularly highlighting the clarity of the content, the practical examples and the programme's ability to help participants apply what they had learned in everyday life and adopt more sustainable habits.

TRAINING EN NUMBERS

44 completed evaluations
Course 1 – Energy Culture and Ecological Transition

🇹🇷 12 · 🇪🇸 11 · 🇷🇴 11 · 🇬🇷 10

43 completed evaluations
Course 2 – Eco-Competencies in Energy Culture

🇹🇷 12 · 🇪🇸 10 · 🇷🇴 11 · 🇬🇷 10

SPAIN

TÜRKIYE

GREECE

ROMANIA

FROM LEARNING TO ACTION: PARTICIPATORY ACTIONS

The eight participatory actions carried out in Spain, Greece, Romania and Türkiye have helped turn the project's learning outcomes into practical experiences adapted to each local context. Through educational activities, debates and community initiatives, they have encouraged citizen participation and commitment to sustainability and the ecological transition.

8 PARTICIPATORY ACTIONS · 4 COUNTRIES

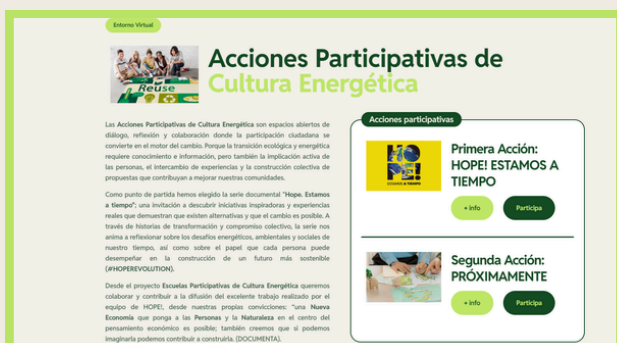

SPAIN

SDGs, Energy Poverty and Ecological Transition

15 participants · Face-to-face

HOPE Online Forum

20 participants · Discussions on the ecological crisis and sustainability

TÜRKİYE

School Disputation Activity

6 student debaters · 40 attendees

School Workshops with Polat Energy

6 schools · 40 teachers · Over 250 students

FROM LEARNING TO ACTION: PARTICIPATORY ACTIONS

GREECE

Yoga & Connection with the Environment

15 participants · Face-to-face

ROMANIA

Sustainability & Community Engagement

15 participants · Face-to-face

Walking & Environmental Awareness

15 participants · Face-to-face

Sustainability in Everyday Life

15 participants · Face-to-face

FROM PARTICIPATION TO CHANGE

These eight experiences show how energy culture can be approached through different activities and methodologies, adapting to the needs of each community. Beyond raising awareness, the participatory actions have created opportunities for people to come together, reflect and exchange ideas, demonstrating the potential of citizen participation to promote a more inclusive and sustainable ecological transition.

FINAL EUROPEAN ONLINE CONFERENCE

Building a Participatory Energy Culture Across Europe

Learning · Cooperation · Community Action

27 OCTOBER 2026
10:00 - 11:30 CEST

ONLINE EVENT

REGISTER NOW: <https://forms.gle/KX1t5gozrLFKvYjJ7>
Free online event

After two years of cooperation, learning and participatory action across four countries, we invite you to join our

Final European Online Conference.

Discover the project's main results, explore the experiences developed by our partners and reflect on how we can continue building a more sustainable and participatory energy culture.
